PROFESSIONAL SUMMARY

Dedicated and results-driven **Frontend Developer** and undergraduate BIT student with extensive hands-on experience building modern, responsive, and high-performance web applications. Proven track record of delivering scalable solutions through freelance projects and professional internships, utilizing the React, Next.js, and JavaScript/TypeScript ecosystems. Adept at translating complex requirements into clean, maintainable user interfaces optimized for speed and accessibility.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C

Frameworks & Libraries: React.js, Next.js, Express.js, Node.js

Databases & ORM: MongoDB, PostgreSQL, Prisma

Tools & Platforms: Git, GitHub, Vercel, Render, Cloudinary, Tailwind CSS

Core Concepts: Object-Oriented Analysis and Design (OOAD), RESTful APIs, State Management, Responsive Web Design, System Design

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

3 Months

Aarambha

- Engineered and maintained responsive user interfaces for client-facing web applications using React.js and modern CSS frameworks.
- Collaborated with backend developers to integrate RESTful APIs, ensuring smooth data flow and dynamic UI rendering.
- Optimized web performance, asset delivery, and cross-browser compatibility to enhance overall user experience.
- Participated in code reviews, agile sprint planning, and debugging sessions to maintain high code quality standards.

Freelance Frontend Developer

1 Year

Self-Employed

- Delivered custom full-stack and frontend web solutions for various clients, managing projects from initial design conception to production deployment.
- Developed scalable web applications and management systems utilizing React, Next.js, and Tailwind CSS.
- Integrated third-party APIs, authentication systems, and media storage solutions to deliver robust client applications.
- Maintained direct client communication to gather requirements, iterate on feedback, and ensure timely project deliveries.

EDUCATION

Bachelor of Information Technology (BIT)

Expected Graduation: 2026

University / College Name

- Relevant Coursework:** Object-Oriented Analysis and Design (OOAD), Database Management Systems, Web Development.
- Designed and implemented full-stack web applications focusing on automation, efficient data management, and responsive UI architecture.

KEY PROJECTS

Luga Shop (E-Commerce Clothes Application)

MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Developed a full-stack fashion e-commerce platform featuring an Admin Panel, User Management, and dynamic product catalogs.
- Implemented secure user authentication, database management, and responsive frontend UI components for seamless online shopping.

Invoice Generator

MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a dynamic, high-performance invoice generation tool allowing users to seamlessly create, customize, and export professional invoices.
- Implemented real-time data calculation, itemized list management, and clean printable/downloadable layout views using modern frontend frameworks.
